

Figure 1

Note on Figure 1: the measurement was determined using the  
 5 laser diffraction spectroscopy method according to the PIDS  
 technique (Polarisation Intensity Differential Scattering)  
 with a spectrometer of the type LS230 made by the company  
 Beckmann-Coulter GmbH / Krefeld, whereby the particle  
 spectrum was calculated and recorded according to volume  
 10 density distribution q3 (see: H. Rumpf, "Mechanische  
 Verfahrenstechnik", Carl Hanser Verlag/ Munich-Vienna 1995,  
 p. 12-15).
